CRAFTING ELEGANCE

The Versatile Performance of Sculptured Casement Windows

Sculptured casement windows stand as a testament to the seamless fusion of artistry and functionality in architectural design.

Characterised by their outward-opening hinges and sleek profiles, sculptured casement windows offer a timeless aesthetic appeal while delivering exceptional performance in terms of energy efficiency, ventilation control, and security.

The versatility of sculptured casement windows lies in their ability to complement a wide range of architectural styles, from traditional to contemporary.

Additionally, these windows can be customised to meet specific requirements, with options for various sizes, configurations, and glazing choices to suit individual preferences and architectural specifications.

ELEGANT FUSION

Vertical Sliding Windows Bridging Classic Design with Modern Innovation

Vertical sliding windows embody the timeless allure of a design classic, while embracing the latest innovations in the industry.

Equipped with spring and spiral balances, along with a unique tilt facility, these windows provide a practical solution for easy cleaning of the outside glass, enhancing both maintenance and accessibility.

Offering a range of features tailored to meet diverse architectural preferences, these windows cater to a wide array of applications, whether in heritage, contemporary, or classic settings.

The option of mechanical joints ensures a seamless transition between sashes, while the inclusion of two choices of cill, a deep base rail, Georgian bars, and run-through horns replicates the charm of traditional timber aesthetics.

DUAL INNOVATION:

Where Functionality Meets Sophistication in Architectural Design - The Tilt & Turn

These windows represent the pinnacle of innovation, ideal for environments with elevated structures or spaces demanding convenient interior cleaning.

Crafted with a distinctive opening mechanism, Tilt & Turn Windows redefine ease of use. A simple quarter turn of the handle grants secure ventilation from the top, ensuring a fresh breeze while maintaining security. But that's not all – with just another quarter turn, these windows gracefully swing fully open inwards, inviting the outdoors in with unparalleled convenience.

In the realm of modern architecture, Tilt & Turn Windows stand as a testament to versatility, blending practicality with timeless elegance.

Discover the perfect synthesis of '*form and function*' with our range of Tilt & Turn Windows.

THE DOORS

In essence, Residential, French and Patio uPVC doors marry form and function seamlessly, offering a winning combination of style, security, and durability. Elevate the aesthetic appeal and security of your home with the endless design possibilities of uPVC doors – where every entrance becomes a reflection of your unique personality and style.

RESIDENTIAL DOOR

There are multiple options for Residential doors dependent on your needs. They can be used as a front door, kitchen door or back door. These multi-functional doors come equipped with high security features and ease of use.

FRENCH DOORS

Transforming your home, letting the light flood into your living area. French doors provide easy access to your garden and patio area. With variety of options and finishes to compliment your home.

PATIO DOOR

A great alternative to French Doors. Patio doors can provide a great vista into your garden. Allowing extra day-light whilst giving comfort and warmth during long winter nights.

RESIDENTIAL DOORS

Step into Outstanding Style, Security and Solace.

Welcome to the world of residential uPVC doors – the perfect solution of style, security, and versatility. Whether adorning side entrances or gracing the back of your home, uPVC doors stand as the perfect embodiment of practicality and aesthetic appeal.

Crafted with meticulous attention to detail, uPVC doors offer a plethora of glazing and configuration options, ensuring a seamless fit for every space and design preference. Whether you prefer clear glass panels to invite abundant natural light or frosted glazing for added privacy, the possibilities are endless.

Bring in the Light

Today the modern family home is all about open plan, with living, dining and kitchen spaces all merging into one.

Sliding patio doors that open onto the garden create indoor/outdoor living at its best. When closed you maximise an uninterrupted view of the outside world, while staying warm and cosy. When open you let the summer in as you seamlessly increase your living space as home and garden become one.

DOUBLE GLAZING

U

U - Value Rating

U - Values are the measurement of the thermal conductivity of materials/products. Expressed as W/m².K the lower U - Value, the better the thermal insulation will be.

G

G - Value Rating

G - Values measure the percentage of heat that passes through the glass. The lower the solar protection and therefore the higher the performance of the glass.

U - Value Range
1.4 to 0.9

(The smaller the number the better the performance)

£

Save Money

Heating bills are incredibly expensive, and families throughout the UK would love to reduce their energy costs and have more disposable money to spend on life's little luxuries

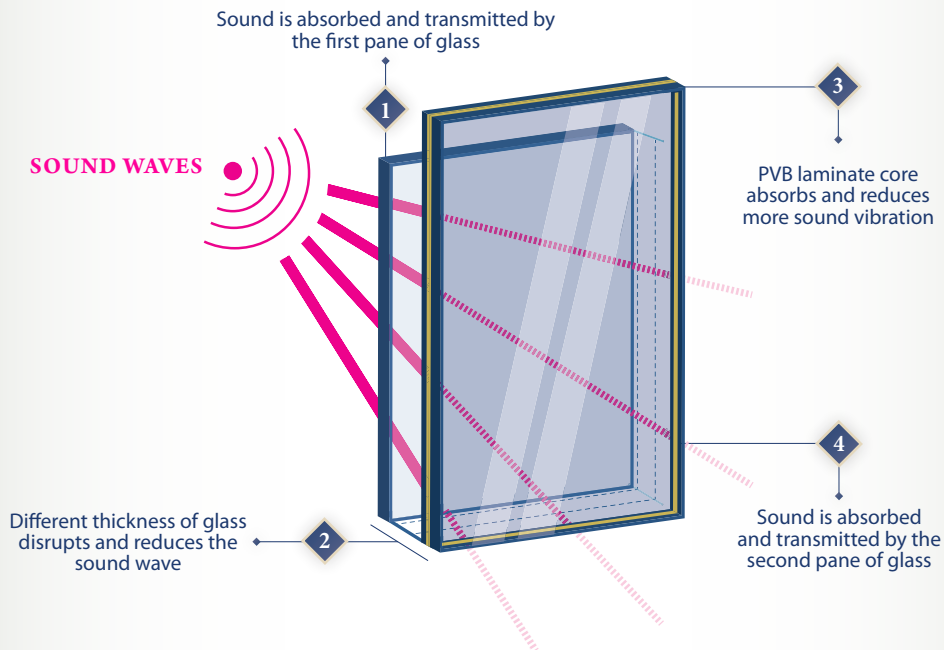

💡

Save Energy

A+ Plus windows are comprised not only of glass, but also a sophisticated composition of other gasses and materials. Ultimately, it means that your heating won't need to be on as often or for as long, even during the coldest months

◆ ACOUSTIC GLASS ◆

In summary, acoustic glass is made through a detailed process involving the selection of high quality materials, lamination with special interlayers, application of heat & pressure and thorough quality inspection. The result is a glass product that effectively reduces noises transmission while maintaining safety and aesthetic standards.

◆ BENEFITS OF ACOUSTIC GLASS ◆

◆ ENHANCED SOUND INSULATION

Acoustic glass is designed to reduce noise levels by dampening sound vibrations, suitable in all locations but particularly around busy urban roads, airports and schools.

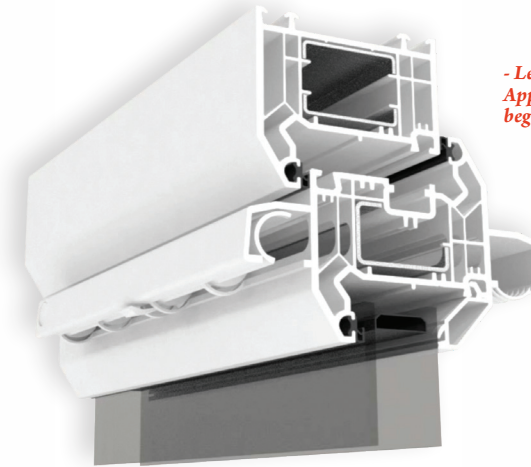

◆ REDUCED STRESS

Lower noise levels can reduce stress and anxiety contributing overall improved better well being. Acoustic Glass can help create a quieter bedroom environment promoting better sleep quality.

Acoustic glass better known soundproof glass or noise reduction glass offers many benefits and is becoming very popular in today's market and adds huge value to your living standards.

◆ TRICKLE VENTS ◆

Trickle Vents - Extract water vapour & indoor air pollutants from areas where they are produced in significant quantities in habitable rooms especially in Kitchens, bathrooms and utility bathrooms
Supply a minimum level of outdoor air for occupants health

- Legislation -
Approved Document F
began on June 15th 2023

◆ WHY TRICKLE VENTS? ◆

VENTILATION

The main benefit of a trickle vent is the ventilation that allows a potentially sealed room to have a natural flow of air to help reduce moisture in the air.

AIR QUALITY AND HEALTH

A background trickle vent will help to reduce airborne toxins and the significant health issues they can cause. Mould loves to grow in damp and cold locations, so any excess moisture in your home increases the risk of this toxic health risk.

SECURITY

Another big benefit is the secure ability to ventilate a room without having to leave the window open. Some windows do have a night latch and can be securely left open with a small gap.

ENERGY EFFICIENT

Trickle vents balance ventilation for health and support energy efficiency. As homes become more airtight, they are crucial for maintaining air quality with a constant flow of fresh air. Though often thought to harm energy efficiency, trickle vents can be closed and controlled in winter when other ventilation is used.

SUSTAINABILITY

Not all plastic is bad. When it comes to windows and doors, uPVC is the most energy efficient amongst its peers. Plastic is an insulator unlike wood which is porous, whilst aluminium can cause thermal bridging and increased condensation.

The window and door industry has made huge strides in the recycling and reuse of uPVC; it has given old frames a value, so they avoid simply being scrapped into landfill.

ENERGY EFFICIENT

The windows and doors in your property are just one part of the puzzle when it comes to achieving an energy efficient home.

The energy efficiency of each window or door is categorised using an energy-rating scale from A++ to C.

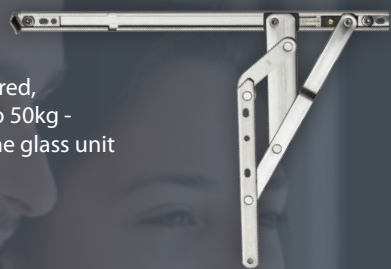

The complete product (frame and glass) is assessed to allow for heat loss, draughts and solar gain, giving a rating that indicates the overall impact of installing the product in your home.

◆ WINDOW SECURITY ◆

ATLAS HINGE

Heavy duty, highly engineered,
With a load bearing of up to 50kg -
supporting the weight of the glass unit

Maintenance free
multi - functional operation

ANTI - JEMMIES

Adding extra security to the opposite side
of the shootbolt lock, whilst protecting the
Atlas hinge

THE SEAL

As important as your seal on your
fridge freezer.

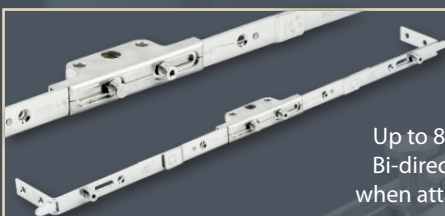

Dual density compound that
creates a balance of robustness
with increased coverage.
Supporting noise reduction

SHOOTBOLT LOCKING

Up to 8 locking points including
Bi-directional opposing points –
when attacked the CAMS lock out

Working in conjunction with security
clips giving 360° total security

HIGH PERFORMANCE GLASS

Next generation
thermal performance.

Meeting all the requirements
& beyond today's legislation

A+

A++

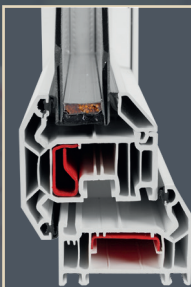

0.9 - 1.4

THE CASEMENT PROFILE

Highly engineered profile
Multi chambered
(with up to 14 when combined with Sash)
This supports energy efficiency and strength

This delivers a robust performance against all the
elements throughout the seasons for years to
come giving total peace of mind

◆ DOOR SECURITY ◆

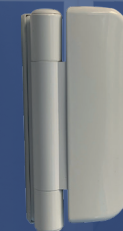

DOOR HINGE

Designed to support heavy load bearing without being intrusive.

Subtle in design

Greater compression than standard hinges, that also supports noise reduction

HIGH SECURITY LOCKING

12 points of locking giving vault type security.

Shootbolts into Top & Bottom of the frame additional security

This also supports compression

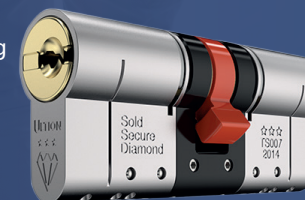

ULTION DOOR BARREL

Ultion Door Barrel x2
TS007 tested 3 Star cylinder offering highest level of security available.

Exclusive Anti – Snap technology

Lockdown mode activated when attacked keeping intruders out.

SECURITY

PRODUCT ACCREDITATIONS

In summary, PAS24 is a British standard that specifies the requirements and test methods for enhanced security performance of doors and windows. The full name of the standard is "PAS 24: Enhanced security performance requirements for doorsets and windows in the UK."

Enhanced Security: PAS24 outlines enhanced security performance criteria for doorsets and windows. Products that meet these criteria provide greater resistance to forced entry compared to standard products.

Testing Methods: The standard includes rigorous testing methods to ensure that doors and windows can withstand various forms of attack. Tests typically include mechanical loading, manual attack methods, and impact testing.

Scope: PAS24 covers various types of doors and windows, including single and double doorsets, and a variety of window styles.

Compliance: For a door or window to be PAS24 certified, it must pass all specified tests. This certification is often required for new builds and renovation projects in the UK to meet building regulations and insurance requirements.

Secured by Design

Police Preferred Specification

Secured by Design (SBD) is a UK police initiative focused on improving the security of buildings and their surroundings to reduce crime. It aims to incorporate crime prevention measures into the design and construction of new and refurbished homes, commercial premises, and public spaces.
